File Translation

Some of the programs that we can translate for either Mac or Windows:

Adobe Acrobat (PDF files)
Adobe Illustrator
Adobe Pagemaker
Adobe Photoshop
Corel Draw
Corel Photo-paint
Macromedia Freehand
Microsoft Publisher
Microsoft Word
Microsoft Excel
Word Perfect
Quark Express
EPS, TIF, JPEG, GIF and other graphic formats
Other Word Processing & Layout Programs

Media: Mac or Windows format floppy disk, zip disk, CD or Email attachment.

Any of these programs will convert to hi-res color-separated or black & white artwork that can be printed out to film or paper output. If these formatted pages need to be placed or imported into another program, a non-editable eps can be generated, although some programs will allow us to generate a file that can be edited in another program. Please specify when ordering and we will let you know if this option is available. We deal with many other file formats, as well as embedded images and low-resolution images - always ask - odds are we can find a way to make it work.

Fonts: We run CrossFont to translate Macintosh and Windows format fonts into either Type 1 or Truetype formats as needed for cross-platform translations.

Color Separations: RGB or CMYK images in a variety of formats can be converted to spot color.

Raster Art Logos: Can be recreated as Vector Art for editing in Illustrator, Freehand or Corel.
